Registered Provider Content Summary

## Water-Repellency and Efflorescence Control in Masonry

### PRESENTATION DESCRIPTION

Provides the details of achieving water-repellency and efflorescence control in masonry construction. While the focus is on single-wythe masonry walls, the admixture technologies presented are applicable to other manufactured products such as pavers and roof tiles.

### LEARNING OBJECTIVES

Learning Objective 1: Identify the sources of moisture in masonry walls

Learning Objective 2: Discuss different methods of achieving water-repellent masonry, and choose the right technology that suits your water-repellent masonry

Learning Objective 3: Choose the right combination of admixtures for water-repellency

Learning Objective 4: Include correct terminology and details for water-repellent masonry admixtures in the specifications

### PARTICIPANTS

Architects, specifiers, owners, contractors, and other construction professionals. Ideal seminar size is six to 20.

### PRESENTATION METHOD

The presenter uses a PowerPoint presentation loaded with photographs.

### PROVIDER

Masonry Advisory Council

### PRESENTER

BASF

**AIA CREDITS:** 1.5 LU

**LENGTH:** 1 Hour

**HSW:** Yes

**A/V Needed:** Electrical power and presentation screen. The CES provides the laptop and projector.

**COST:** There is no cost to the firm for the presentation or the lunches provided.

### PRESENTER QUALIFICATIONS

BASF presenters are experienced in construction practices. Their qualifications include formal manufacturer's training and extensive applied fieldwork.
