TOURS

Tour: Fabrication of Natural Stone - Processing that Meets Design Specifications

Program approved for 1 LU/HSW by the American Institute of Architects (AIA/CES) and the American Society of Landscape Architects (LA CES).

This course is an overview of the equipment and sequence of fabrication processes used to create cuts and finishes per the design specifications for natural stone building products. Participants will recognize how architectural drawings translate into shop tickets and apply to the fabrication process. Illustrative examples of natural stone fabrication standards and how finished products are prepared for shipping and installation will convey realistic expectations in specifying design requirements for building and landscape projects.

Tour: Quarrying Natural Stone - Selection to Extraction

Program approved for 1 LU/HSW by the American Institute of Architects (AIA/CES) and the American Society of Landscape Architects (LA CES).

This course is to observe an operating quarry with an overview of granite geology and composition. Understand fundamentals of quarrying granite by viewing an extraction operation that results in commonly used material. Witness how employing industry best practices support sustainable operation goals toward social, economic and environmental responsibility.

Coldspring is an approved American Institute of Architects (AIA), American Society of Landscape Architects (ASLA) and Interior Design Continuing Education Council (IDCEC) continuing education provider.
