Why Specify Certified Stone: How the Natural Dimension Stone Sustainability Standard can Assist Green Building Projects

Program approved for 1 LU/HSW by the American Institute of Architects (AIA/CES), the American Society of Landscape Architects (LA CES), and Green Business Certification Inc. (GBCI).

This course highlights how the dimensions stone sustainability standard (ANSI/NSC 373) can assist projects with sustainability goals. The standard examines and verifies through a third party, numerous areas of stone production such as: water usage, custody and transportation, site and plant management, land reclamation, corporate governance, energy, waste, chemicals, worker health and safety innovation credits. It also includes a companion Chain of Custody (COC) program, which ensures traceability of certified stone from the quarry to processing and throughout the supply chain and ultimately to their journeys end.

Coldspring is an approved American Institute of Architects (AIA), American Society of Landscape Architects (ASLA) and Interior Design Continuing Education Council (IDCEC) continuing education provider.
