# AIA Continuing Education System

Registered Provider Content Summary

## Fluid-Applied Air, Water and Vapor Barriers

### PRESENTATION DESCRIPTION

Participants will learn the role of barriers in building envelope performance, learn how to treat rough openings in the wall using fluid-applied air barrier systems, learn air barrier requirements and ways to demonstrate compliance, learn the similarities and differences between air, vapor and water-resistive barriers and understand the criteria of a performance-based fluid-applied barrier material specification.

### LEARNING OBJECTIVES

Learning Objective 1: The role of barriers in building envelope performance

Learning Objective 2: Methods of evaluating air/water-resistive barrier material and assembly performance before and after installation

Learning Objective 3: How to treat rough openings using fluid-applied air barrier systems

Learning Objective 4: What to require in a performance-based fluid-applied air barrier material specification

### PARTICIPANTS

Architects, specifiers, owners, contractors, and other construction professionals. Ideal seminar size is six to 20.

### PRESENTATION METHOD

The presenter uses a PowerPoint presentation loaded with photographs.

### PROVIDER

Masonry Advisory Council

### PRESENTER

BASF

**AIA CREDITS:** 1 LU

**LENGTH:** 1 Hour

**HSW:** Yes

**A/V Needed:** Electrical power and presentation screen. The CES provides the laptop and projector.

**COST:** There is no cost to the firm for the presentation or the lunches provided.

### PRESENTER QUALIFICATIONS

BASF presenters are experienced in construction practices. Their qualifications include formal manufacturer's training and extensive applied fieldwork.
