Registered Provider Content Summary

Waterproof Coatings for High Rise Construction – REST03

PRESENTATION DESCRIPTION

This program takes a look at the unique challenges related to coating high rise buildings. It begins with a discussion of how exterior waterproof coatings work. Participants learn the key to proper surface preparation and coating selection. Benefits and limitations of different coating chemistries are explored. The program will conclude with a discussion of best practices and troubleshooting common coatings applications.

LEARNING OBJECTIVES

Learning Objective 1: Understand how exterior waterproof coatings work.

Learning Objective 2: Learn the preparation steps critical for success.

Learning Objective 3: Weigh the benefits and limitations of various systems.

Learning Objective 4: Troubleshoot coating applications.

PARTICIPANTS

Architects, specifiers, owners, contractors, and other construction professionals. Ideal seminar size is six to 20.

PRESENTATION METHOD

The presenter uses a PowerPoint presentation loaded with photographs illustrate the importance of Fluid-Applied Air and Water-Resistive Barriers

PROVIDER

Masonry Advisory Council

PRESENTER

BASF

AIA CREDITS: 1 LU

LENGTH: 1 Hour

HSW: Yes

A/V Needed: Electrical power and presentation screen. The CES provides the laptop and projector.

COST: There is no cost to the firm for the presentation or the lunches provided.

PRESENTER QUALIFICATIONS

BASF presenters are experienced in construction practices. Their qualifications include formal manufacturer's training and extensive applied fieldwork.
