

TROUBLESHOOTING MASONRY CONSTRUCTION

PRESENTATION DESCRIPTION

An overview of procedures for identifying and preventing problems, and maintaining and restoring the appearance and functionality of masonry and the masonry-veneer building envelope.

LEARNING OBJECTIVES

1. Troubleshoot the main problems impacting appearance and performance of new masonry.
2. Explain how proper new-construction cleaning prevents problems.
3. Identify problems breathable air barriers solve.
4. List ways of solving problems common to existing masonry.
5. Describe the main factors involved in restoring and maintaining the appearance and performance of historic building envelopes.

PARTICIPANTS

Architects, specifiers, owners, contractors, and other construction professionals. Ideal seminar size is six to 20. Participants receive the handout *New Rules for New Construction Clean-Down of Contemporary Masonry Buildings, and Air Barriers For Masonry Cavity Wall Construction*

PRESENTATION METHOD

The presenter uses a well-illustrated PowerPoint presentation to show what construction professionals must know about construction and care of masonry buildings. Participants see the results of common mistakes, as well as correct procedures. A question and answer period concludes the program.
